The Annual Index for DATA PROCESSING DIGEST, Volume 20, 1974, is included in this supplement. Index entries enclosed in quotation marks are complete article titles or book titles as they appeared in Data Processing Digest. Entries in Capital letters are titles of periodicals. For articles written by more than one person, authors are listed as a group as well as individually. All articles are cited by one or more subject words. The numbers following the alphabetized entries indicate issue and pages in which the item is found.

- "Behavioral Factors Influencing the Adoption Of an Experimental Information System," 3-7
- "Behind the Privacy Bill," 12-3
- Bell, A.G., P.J. Hallowell, and D.H. Long, 5-7

REFERENCE LIST

The staff of Data Processing Digest regularly monitors more than 200 computer, trade, and management periodicals for appropriate articles to digest each month. Every June issue and December Index Supplement includes all the publishers' addresses for your convenience. During other months of the year, only the periodicals referenced in that issue are given. We ask you to please request copies of originals from the publisher of the periodical, rather than write to Data Processing Digest, as we do not copy or reprint, and your request would be delayed. Books should be ordered from their publishers or from a local technical book store.
